

Exploration?

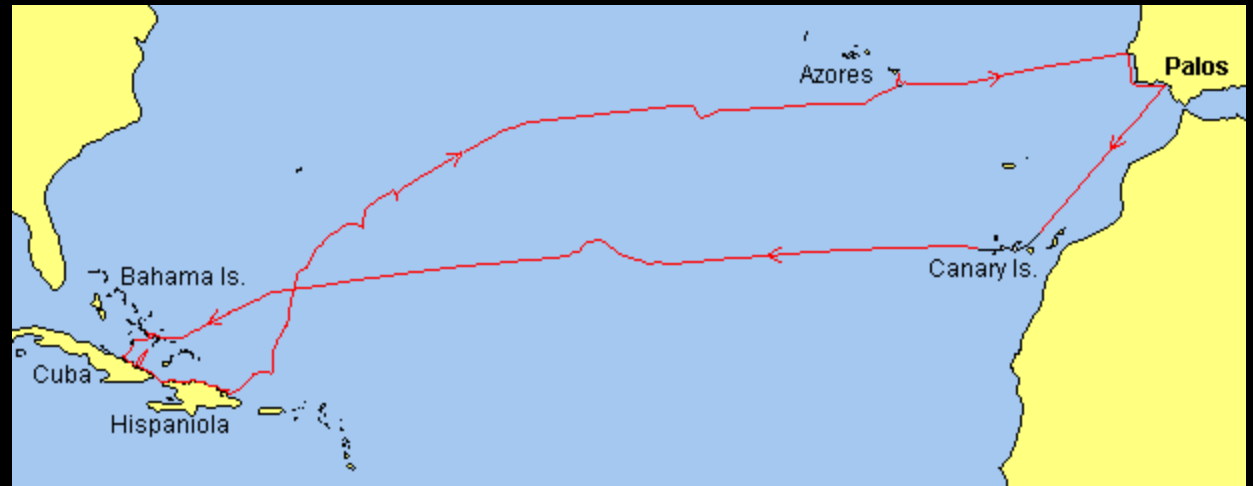

- Does anyone here like to explore?

Humans have been exploring since the beginning of time...

Christopher Columbus - 1492

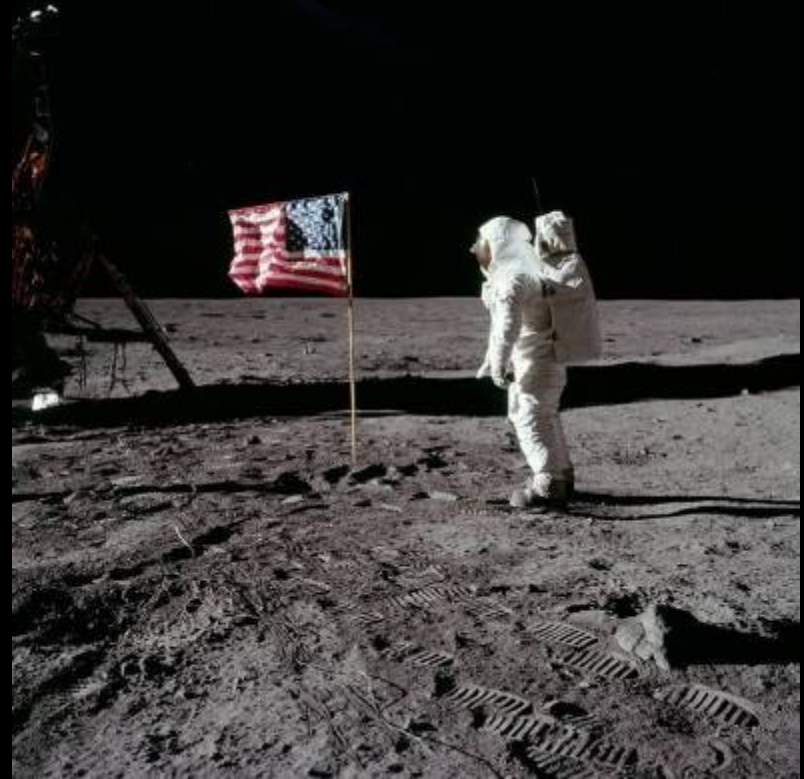

Lewis and Clark - 1803

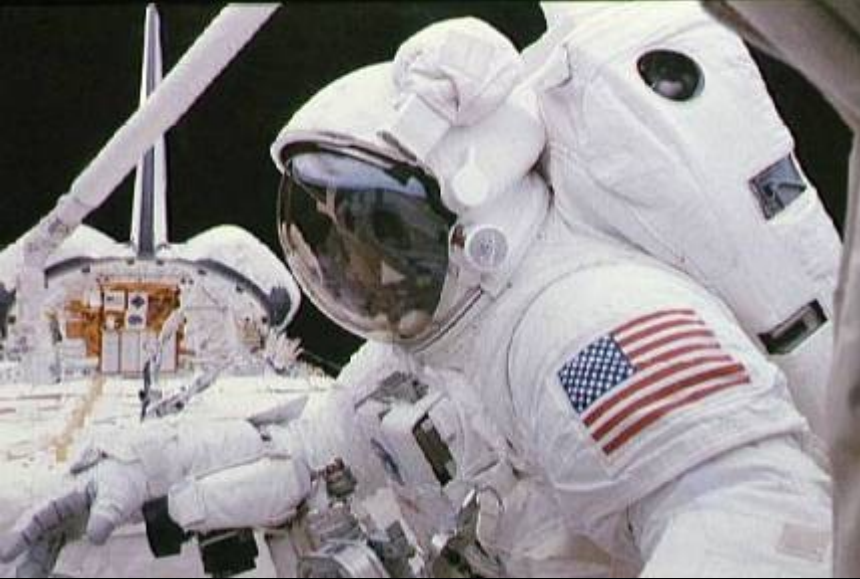

Apollo

July 20th, 1969

Only 12 Humans have
walked on the Moon

Space Shuttle – first launch 1981

Rip R. Smith
© 1991 NASA

International Space Station – began 1998

Want to go?

You can!

Private Space Station

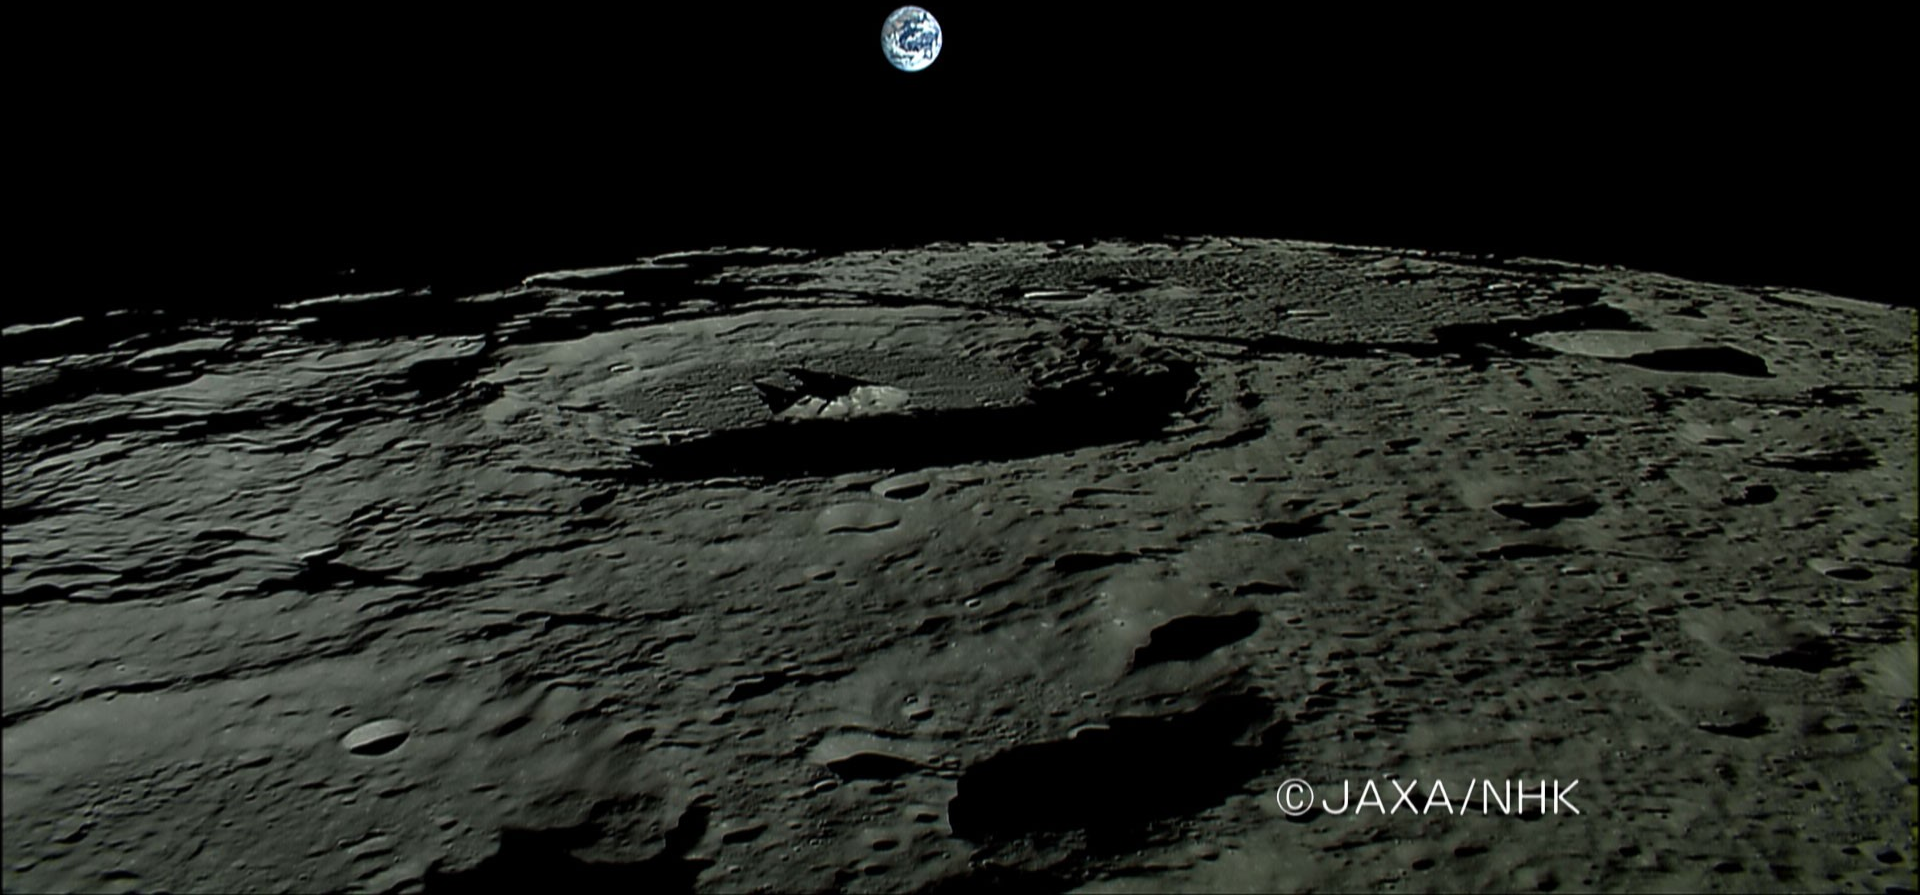

Private Astronauts

Where we've been

The Moon

©JAXA/NHK

One of Our Old Landing Sites

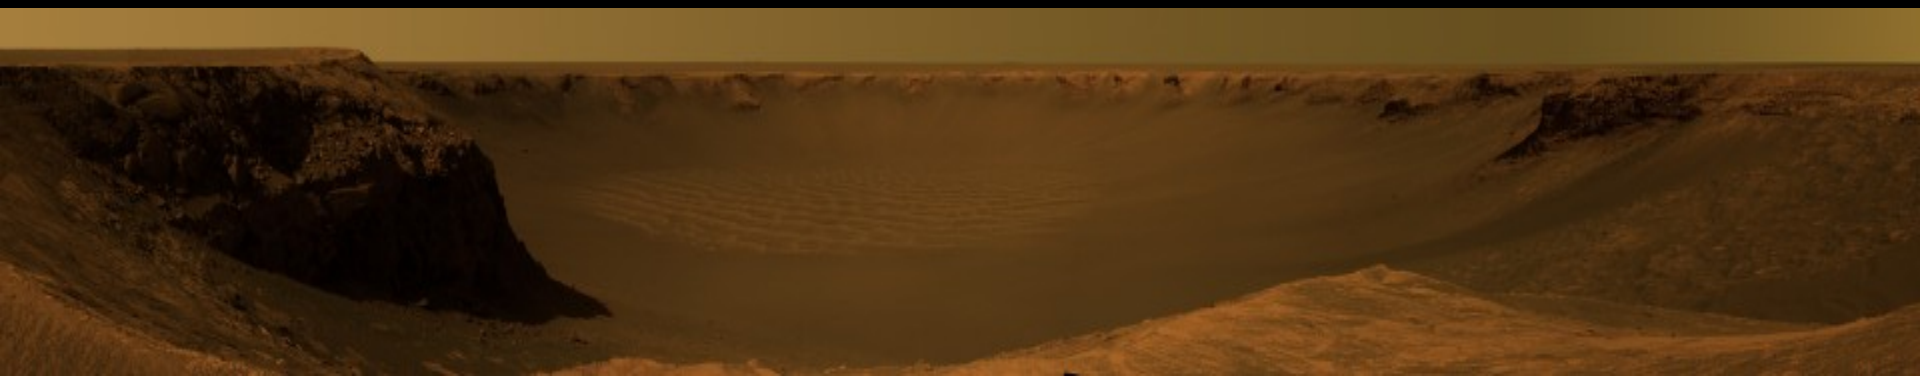

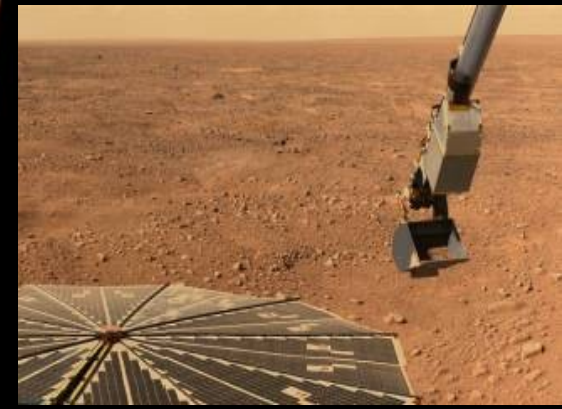

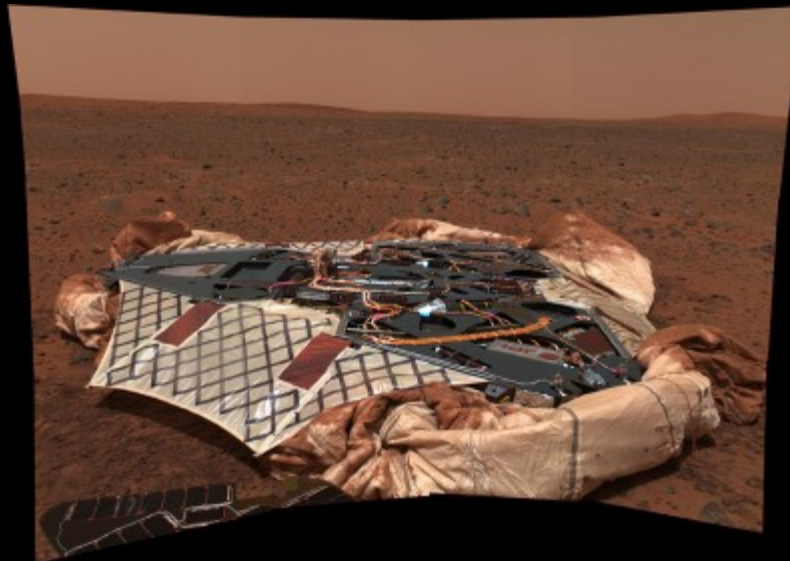

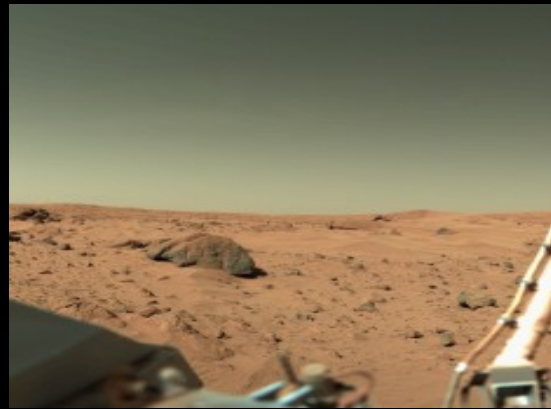

Our Next Landing Site?

Planet Mars...?

Robotic Explorers

Are on Mars already

Others are further from Home

The Cassini satellite took this picture

Furthest from home

The Voyager spacecraft has left the Solar System!

Voyager was this far away in 1990!

What's next?

Where should we explore?

How will we get there?

It's up to you!

Dream Big!

Ask for help!

Never give up!

This computer sent
us to the Moon

VS

Your phone is smart
enough to do this too

What are YOU going to do with that power?

The future is whatever YOU want it to be!!

Work hard, study hard, and nothing is impossible!
